Ananke IT Solutions is introducing affordable, creative web design to it's suite of services.

Providence, Rhode Island- November 17, 2008.

Ananke IT Solutions announced today that it will be launching a new website design service to businesses looking to create an affordable quality website or to fine-tune their existing pages. This latest addition to Ananke's full suite of IT services takes a simple approach to web design by offering three packages, depending on the specific needs of the client. After completing a targeted-business questionnaire with an Ananke Web Specialist, clients can choose between a Basic, Moderate or Progressive Web Design Package.

Eric Emerson, of Barrington, R.I., has been brought in by Ananke to head the delivery team. Mr. Emerson has over ten years experience in website creation and design and is a member of the Continuing Education faculty at the Rhode Island School of Design, specializing in graphic and web design. "Eric brings a wealth of creativity and subject-matter expertise to the Ananke organization and we are very excited to have him leading this team", said Paul Sousa, VP of Business Development at Ananke.

"The concept is simple", Mr. Sousa added, "We have had several business owners approach us in frustration, looking for a straight-forward approach to designing their websites. We saw an opportunity to create a web-design solution for small businesses which would take the stress out of the process, and provide them with a quality website to help grow their business and improve their visibility in the marketplace. Depending on the package a client selects, they can have a professional website up and running in as little as two weeks. "

About Ananke IT Solutions
